ELEMENT ASSEMBLY
« OPTICAL FIBER »
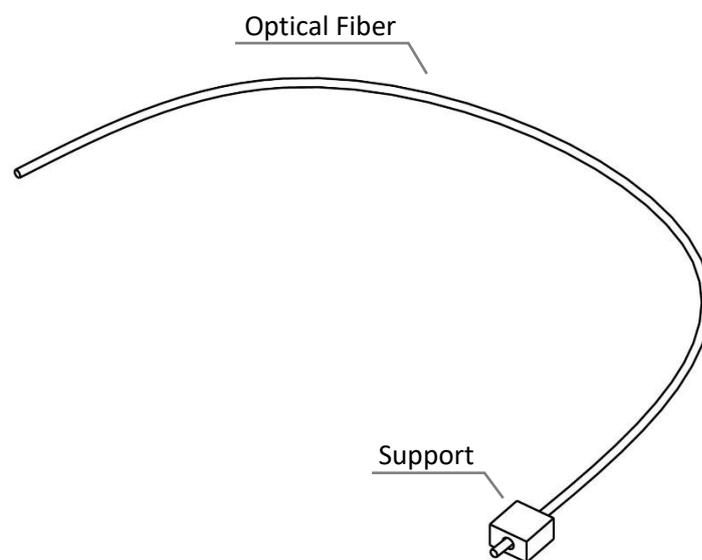

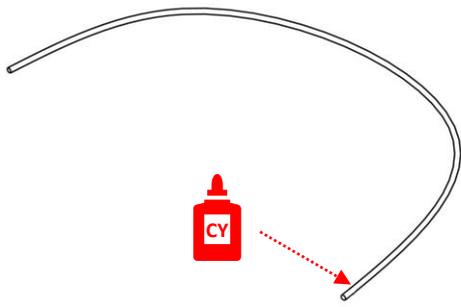

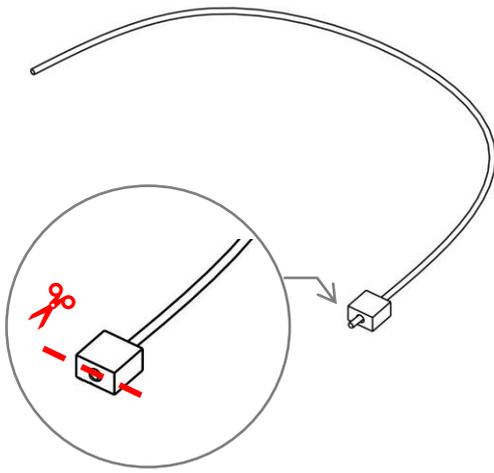

Optical Fiber

Support

Element « Optical Fiber » includes:

- 5 x Optical Fiber 100mm
- 5 x Plastic Support

Apply a small amount of cyanoacrylate glue onto the Optical Fiber.

Pass the Optical Fiber through the Support to glue it.

Cut the excess end of the Optical Fiber flush to the Support.

Optical Fiber End

Lighting side of the LED

LED String

Glue the Support with Optical Fiber to the LED drop (cyanoacrylate glue).

⚠ **Important**
Make sure to place the Support on the lighting point of the LED (You can turn on the LED to check).
